SUMMARY

Applied Computer Science graduate who builds practical software and data systems — from multi-agent AI platforms and cloud-native operations tooling to analytics pipelines that turn raw operational data into decisions. Two years of professional engineering experience in Python automation, SQL data modelling and Power BI reporting, alongside campus leadership roles. Comfortable owning a problem end to end and shipping it.

PROFESSIONAL EXPERIENCE

Project Engineer GQBAY Software Pvt Ltd — Hyderabad, India (Remote) - Built and maintained Python automation replacing manual data-handling workflows, cutting turnaround on recurring engineering and corporate data streams from hours to minutes. - Designed normalised SQL schemas for high-performance applications and tuned slow queries through indexing and refactoring. - Developed Power BI dashboards and reporting pipelines converting raw operational data into decision-ready KPIs for stakeholders. - Implemented data-validation checks at pipeline ingestion, catching malformed records before they reached reporting layers. <i>Tech: Python (Pandas, SQLAlchemy) • SQL • Power BI (DAX, data modeling) • Excel</i>	Apr 2025 – Apr 2026
Junior Project Engineer GQBAY Software Pvt Ltd — Hyderabad, India (Remote) - Automated recurring data workflows with Python, reducing manual effort across internal systems and client projects. - Wrote and optimised SQL for structured data manipulation and reporting; built Power BI reports translating operational data into insight for cross-functional stakeholders. <i>Tech: Python • SQL • Power BI • Excel</i>	May 2024 – Apr 2025
Lead, X-Patrol St. Francis Xavier University — Antigonish, NS - Coordinated a campus safety team, mentored new hires and maintained clear communication during events and daily operations. - Acted as the link between leadership and team members, translating priorities and clarifying responsibilities. Awarded XP of the Year.	Sep 2025 – May 2026
Constituency Director & Co-Chair, Budget & Finance Committee StFX Students' Union — Antigonish, NS - Represented international students in union governance and advocated for their academic and social concerns with university administration. - Co-chaired budgeting, financial reporting and operational review, supporting informed decision-making on funding initiatives and policy. Awarded Volunteer of the Year.	Sep 2025 – May 2026

SELECTED PROJECTS

CloudScale FleetOps cloudscale-fleetops.vercel.app • github.com/mahinvishnukb/cloudscale-fleetops Maritime fleet operations platform on .NET 8 Clean Architecture with an Angular 22 front end: real-time IoT telemetry over SignalR, event-driven manifest processing on AWS Lambda, provisioned with Terraform, containerised for Kubernetes, 186 automated tests. <i>Tech: .NET 8 • Angular 22 • PostgreSQL • AWS Lambda • Kubernetes • Terraform • Docker</i>	2026
Enterprise GenAI Operations Assistant github.com/mahinvishnukb/enterprise-genai-ops-assistant Production-grade multi-agent AI platform combining RAG over documents, NL2SQL, analytics and conversation agents, auto-routed through a single chat interface. <i>Tech: Python • FastAPI • React • TypeScript • ChromaDB • SQLAlchemy</i> Also: Maritime Operations & Crew Analytics Platform (Python, PostgreSQL, Pandas) • Word-Level Sign Language Recognition (YOLOv5, MediaPipe) • Proplytics Logistics Intelligence Platform (Dash, Plotly).	2026

EDUCATION

Master of Applied Computer Science	St. Francis Xavier University — Antigonish, NS	2024 – 2026
Bachelor of Engineering, Computer Science	Kongu Engineering College — Perundurai, India	2020 – 2024

TECHNICAL SKILLS

Languages	Python, SQL, TypeScript, C#, JavaScript
Data & BI	PostgreSQL, Pandas, SQLAlchemy, Power BI (DAX), Excel, data modelling
Web & Cloud	.NET 8, Angular, React, Tailwind, FastAPI, AWS Lambda, Docker, Kubernetes, Terraform
AI / ML	RAG, NL2SQL, multi-agent systems, ChromaDB, YOLOv5, MediaPipe
